

Lester Yvan Ramirez

+639292090807 | yvanmain28@gmail.com | <https://www.linkedin.com/in/lester-yvan-ramirez-353b44293/>

I am a 4th-year Computer Science student at Mapúa Malayan Colleges Laguna with a strong foundation in Cloud Architecture, IT Operations, and Systems Support. Backed by official AWS and CompTIA certifications, I combine technical problem-solving with proven experience in project coordination, financial management, and cross-functional communication. I excel at bridging the gap between technical infrastructure and business objectives to ensure secure, resilient, and highly available IT environments.

EDUCATION

Mapúa Malayan Colleges Laguna

Bachelor of Science in Computer Science

Aug 2022 - Present

- Specialized Machine Learning
- Dean's Lister

CERTIFICATIONS

AWS Academy Graduate - Cloud Foundations

Google Foundations of Project Management

CompTIA Tech+ Certification

Amazon Full Stack Web Development

Primary Project: Fitness Buddy an AI-Driven Health & NCD Risk Mitigation App

- Advanced NLP & LLMs:** Fine-tuned instruction-based models including FLAN-T5 and Llama to provide high-accuracy health coaching and diagnostic gisting.
- RAG Architecture:** Engineered a Retrieval-Augmented Generation (RAG) system to integrate verified medical and fitness knowledge bases, ensuring the AI provides evidence-based advice to reduce NCD risk factors while minimizing hallucinations.
- Performance Metrics:** Validated model accuracy using ROUGE metrics, specifically optimizing for gisting and text generation performance in a health-sensitive context.
- Full Stack Deployment:** Built a production-grade environment using Firebase for real-time user data syncing and SQLfor structured health records, deploying via Hugging Face Inference APIs for high availability.

SKILLS

Project Management & Leadership

- Lifecycle Management:** Applied core project phases—Initiating, Planning, Executing, and Closing—to oversee departmental initiatives and technical development for the "Fitness Buddy" app.
- Agile & Waterfall Methodologies:** Utilized Agile "sprints" for software coding and Waterfall planning for large-scale campus events to ensure all milestones were met on time.
- Financial Oversight & Auditing:** Managed and audited a departmental budget exceeding ₱250,000 as CCIS Student Council Treasurer, ensuring transparent fund allocation for college-wide projects.
- Stakeholder Coordination:** Acted as a central point of contact between student leaders, university offices, and external partners like PLDT and Yellow Cab to secure project funding and concessions.
- Strategic Problem Solving:** Identified potential project risks and developed "Plan B" scenarios to keep operations running during unexpected shifts.
- Technical Communication:** Translated complex technical requirements into clear, functional plans for cross-functional teams, focusing on user-centric solutions.

Software & Web Development

- Full Stack Integration:** Built end-to-end applications by connecting modern front-end interfaces to backend logic and cloud hosting.
- Database Management:** Created and structured SQL and real-time databases (like Firebase) to store and sync user information instantly.
- Mobile Development:** Developed native Android applications with a focus on user-centric design and smooth navigation.
- Version Control:** Managed code updates and collaborated on development tasks using GitHub to track changes and prevent errors.

Cloud & IT Infrastructure

- AWS Cloud Architecture:** Designed and set up cloud environments using AWS Core Services, with a focus on choosing the right pricing models to keep compute costs low.
- System Reliability:** Applied Business Continuity Planning (BCP) and security best practices to ensure apps stay online and user data protected.

EXPERIENCE

GMA Research Team, UL Solutions

AI Intern

June 2026 - Present

- Developed an AI-powered regulatory research assistant to improve researcher efficiency by automating Excel data processing, regulatory record extraction, validation, and draft workbook generation.
- Applied AI solutions to help researchers complete tasks more efficiently and accurately.

Marketing and Admissions Office (MAdO), Mapúa MCL

Student Assistant

Nov 2024 - Jan 2025

- Identified and engaged prospective students during school-to-school recruitment drives, effectively communicating university value propositions to drive enrollment.
- Managed inventory and distribution of promotional materials for large-scale marketing events and recruitment caravans.

Information Technology Services Office (ITSO), Mapúa MCL

Student Assistant

May 2024 - Sep 2024

- Managed the end-to-end production process for student identification cards, ensuring high data accuracy and quality control for the campus community.
- Provided first-level hardware troubleshooting and software assistance for office-specific IT resources to maintain departmental productivity.
